

Assignment for SDE (Web) Internship

IS Search Page:

1. Assume you are replicating our internship search page (<https://internshala.com/internships/>) in ReactJS framework.
 - a. Make a search page that contains the list of internships (fetch the data using the API - <https://internshala.com/hiring/search>)
 - i. There should be a **Filters** section:
 1. One should be able to filter based on
 - a. Profile of internship
 - b. Location of internship
 - c. Duration of internship
 - d. Stipend of Internship
 2. Filtering is to be done in the frontend only (no need for additional requests)
 2. Try to replicate the UI as much as possible to our internship search page, but you are open to add your innovations/ ideas

Technologies:

1. Please use *React/ NextJS* for making this web app.

Mainly, we want you to concentrate on the following things:

1. Neat & simple design
2. Good coding practices (write readable, modular code)

Share the following:

1. GitHub repository link of your project
2. Link where you've hosted the app
